

Saurav Mehto

Full Stack Engineer (MERN) · AI Software Engineer

New Delhi, India | +91 8130699818 | sauravmehto.98@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack and AI Software Engineer with nearly 4 years of experience building enterprise web platforms, FastAPI/Python backends, and production AI products. At Data Alpha AI, delivered portfolio analytics, financial-data infrastructure, Snowflake natural-language BI, and go-to-market data pipelines, from requirements through React, Claude/LangGraph, and Docker. Applies SQL, Python, Snowflake, and LLM orchestration to products used by internal teams and in client demonstrations.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++

Data & Analytics: SQL, Python, Snowflake, Streamlit, data pipelines, financial data, natural-language BI, reporting

AI / LLM: Claude API, LangGraph, Model Context Protocol (MCP), prompt engineering, AI agents, LLM integration

Backend & APIs: FastAPI, Node.js, Express.js, Django, C# / ASP.NET, REST APIs, GraphQL

Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Material UI, Vite, Three.js

Databases & Tools: Snowflake, MongoDB, MySQL, Firebase, Docker, Git, GitHub Actions, CI/CD, Playwright, Jest

PROFESSIONAL EXPERIENCE

Full Stack Engineer / AI Software Engineer — Data Alpha AI | Dec 2025 – Present

- Delivered four production AI products for internal teams and client demonstrations — portfolio analytics, financial-data infrastructure, natural-language BI, and go-to-market automation — from requirements through Docker/VPS deployment.
- Owned React/Vite frontends, FastAPI/Python backends, and Claude API orchestration, taking each product from idea to a working demo in days rather than weeks.
- Translated business requirements from leadership into AI proofs of concept, reducing manual effort on portfolio review, lead qualification, and reporting.
- Released products with Docker and Portainer, including MFA authentication and SQL-injection guardrails on the Snowflake analytics application.

Front-End Developer — Paisalo Digital Limited | Jan 2024 – Dec 2025

- Built and structured an internal ERP in React.js, Three.js, and .NET REST APIs, delivering multiple modules on a reusable UI component library.
- Shipped production school websites for Delhi Public School Rajnagar (Ghaziabad), Delhi Public School Taj City (Agra), and Delhi Public School Agra on the same React/.NET stack.
- Integrated SQL databases and .NET backend services and shipped features with cross-functional teams on schedule.

Senior Web Developer — AeroTrav | Jun 2023 – Dec 2023

- Designed and built a flight-booking platform in React.js and React Native with Stripe and Razorpay, and owned frontend architecture across web and mobile.

Full Stack Web Developer Intern — NullClass | Oct 2022 – Apr 2023

- Shipped 3+ web applications in React.js with responsive interfaces built in Figma, Material UI, and Tailwind CSS.

PROJECTS

Nexus AI v2 — Agentic Portfolio Rebalancing | LangGraph, FastAPI, React, Claude, yfinance

- Built an 11-node LangGraph workflow that ingests portfolio CSVs, Yahoo Finance prices, and sector news, then fuses return, sentiment, trend, allocation, and risk into a 0-100 score for buy-to-sell recommendations. Shipped as CLI, FastAPI, and a React dashboard.

Local Stock Analyst — Financial-Data MCP Server | Python, MCP, Finnhub, Alpha Vantage, SEC EDGAR

- Built a Model Context Protocol server with 50+ financial-analysis tools across nine domains, routed across 10 providers including Finnhub, Alpha Vantage, FMP, and SEC EDGAR, with caching and rate-limit guards.

GTM Intelligence Platform — Scraping and Enrichment Pipeline | Python, Playwright, Apollo API, HubSpot

- Automated lead research with a three-tier scraper and a six-source resolution waterfall, then enriched verified work email and direct dial via Apollo and synced qualified contacts into HubSpot.

Snowflake Dashboard Generator — Natural-Language BI | Streamlit, Claude, Snowflake, Docker

- Built natural-language BI on Snowflake: plain-English requests become validated SQL, failed queries are auto-corrected into charts, with a data-assistant chatbot, semantic layers, and a Docker/Portainer deployment.

EDUCATION

Master of Computer Applications (MCA) — Lal Bahadur Shastri Institute of Management, Delhi | 2020 – 2022

Bachelor of Computer Applications (BCA) — Shree Guru Gobind Singh Tricentenary University, Haryana | 2017 – 2020
