Saurav Mehto

Full Stack Engineer (MERN) · AI Software Engineer
New Delhi, India | +91 8130699818 | sauravmehto.98@gmail.com | LinkedIn | GitHub | sauravmehto.netlify.app

Professional Summary

Full Stack and AI Software Engineer with nearly 4 years of experience building enterprise web platforms, FastAPI/Python backends, and production AI products. At Data Alpha AI, delivered portfolio analytics, financial-data infrastructure, Snowflake natural-language BI, and go-to-market pipelines with React, Claude/LangGraph, SQL, and Docker for internal teams and clients. Experienced in designing scalable APIs, containerized deployments, and cross-stack feature ownership from prototype to production.

Core Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++
Data & Analytics: SQL, Python, Snowflake, Streamlit, data pipelines, financial data, natural-language BI, reporting
AI / LLM: Claude API, LangGraph, Model Context Protocol (MCP), prompt engineering, AI agents, LLM integration
Backend & APIs: FastAPI, Node.js, Express.js, Django, C# / ASP.NET, REST APIs, GraphQL
Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Material UI, Vite, Three.js
Databases & Tools: Snowflake, MongoDB, DuckDB, MySQL, Firebase, Docker, Git, GitHub Actions, CI/CD, Playwright, Jest

Professional Experience

Full Stack Engineer Dec 2025 – Present
Data Alpha AI New Delhi, India
- Delivered four production AI products for internal teams and client demonstrations — portfolio analytics, financial-data infrastructure, natural-language BI, and go-to-market automation — from requirements through Docker/VPS deployment.
- Owned React/Vite frontends, FastAPI/Python backends, and Claude API orchestration, taking each product from idea to a working demo in days rather than weeks.
- Translated business requirements from leadership into AI proofs of concept, reducing manual effort on portfolio review, lead qualification, and reporting.
- Released products with Docker and Portainer, adding Snowflake OAuth and a read-only SQL gate to the BI platform.
- Designed FastAPI backends to process and serve financial data pipelines at scale, with focus on API performance and reliability for downstream consumption.

Front-End Developer Jan 2024 – Dec 2025
Paisalo Digital Limited New Delhi, India
- Built an internal ERP in React.js, Three.js, and .NET REST APIs, with multiple modules on a reusable UI component library.
- Shipped production school websites for Delhi Public School Rajnagar (Ghaziabad), Delhi Public School Taj City (Agra), and Delhi Public School Agra on the same React/.NET stack.
- Integrated SQL databases and .NET backend services and shipped features with cross-functional teams on schedule.
- Built responsive, accessible interfaces with semantic HTML and modern CSS, ensuring consistent design language across multiple school websites and internal ERP modules.

Web Developer Jun 2023 – Dec 2023
AeroTrav New Delhi, India
- Designed and built a flight-booking platform in React.js and React Native with Stripe and Razorpay, and owned frontend architecture across web and mobile.

Full Stack Web Developer Intern Oct 2022 – Apr 2023
NullClass New Delhi, India
- Shipped 3+ web applications in React.js with responsive interfaces built in Figma, Material UI, and Tailwind CSS.

Projects

Private Credit AI Agent | *React, FastAPI, LangGraph, Claude, MongoDB*
- Built venture-debt analytics that compute each deal's IRR, MOIC, amortization schedule, and eight restructure scenarios in Python from an uploaded deal tape, with a LangGraph agent using 21 finance tools to explain results via Claude.

Stockportflio AI Agent | *LangGraph, FastAPI, React, Claude, Finnhub*
- Built an 11-node LangGraph agent that scores each holding on returns, trend, sector allocation, and news sentiment to recommend Buy, Hold, or Sell, with Finnhub-to-Yahoo Finance fallback and Claude explaining only source-labelled evidence.

LeadPipe | *Python, FastAPI, React, Playwright, Apollo API*
- Built a data pipeline that processes company lists into ranked decision makers: a three-tier scraper with fallback logic finds LinkedIn profiles, scores each 0–100 on data quality, enriches with Apollo work email and direct dial, and exports HubSpot-ready results for downstream consumption.

DA One | *React, FastAPI, Claude, Snowflake, DuckDB*
- Built natural-language BI over Snowflake and uploaded files: a streaming Claude agent runs validated read-only SQL, searches documents, saves versioned dashboards, and generates Excel reports behind Snowflake OAuth.
- Implemented read-only SQL validation and Snowflake OAuth to enforce security and reliability, ensuring users cannot modify underlying data while maintaining fast query performance.

Education

Master of Computer Applications (MCA) 2020 – 2022
Lal Bahadur Shastri Institute of Management Delhi
Bachelor of Computer Applications (BCA) 2017 – 2020
Shree Guru Gobind Singh Tricentenary University Haryana
